

First Part

1. Which function is used to get all records from the item table?

- a) `$result-DB::get('item')->table();`
- b) `$result = DB->table('item')->get();`
- c) `$result = DB::table('item')->getAll();`
- d) `$result = DB::table('item')->get();`

Answer: b) `$result = DB->table('item')->get();`

2. Which middleware is used to manage CSRF protection?

- a) `VerifyCsrfToken.php`
- b) `RedirectCsrfToken.php`
- c) `TokenVerifyCsrf.php`
- d) `RedirectIfAuthenticated.php`

Answer: a) `VerifyCsrfToken.php`

3. Which files are used for Laravel database connection? (choose two)

- a) `database.php`
- b) `.env`
- c) `config.php`
- d) both a,b

Answer: d) both a,b

4. Which is used in Laravel to create large amounts of sample data?

- a) Faker Package
- b) Migration
- c) Seeder
- d) Fake package

Answer: c) Seeder

5. What is the purpose of Laravel Forge in Laravel?

- a) Conjunction with another hosting service
- b) Connection with the database
- c) Loading the full application
- d) Deploying Laravel apps to the cloud

Answer: a) Conjunction with another hosting service

6. How can you clear the cache using an Artisan command?

- a) `$ php artisan route:remove`
- b) `$ php artisan route:destroy`
- c) `$ php artisan route:cache`
- d) `$ php artisan route:clear`

Answer: d) `$ php artisan route:clear`

7. What is the function of `composer.json`?

- a) This file is used to configure the composer package manager.
- b) This file identifies the packages you'd like to integrate into your application.
- c) This is used to regularly maintain your application package.
- d) This file is used to manage user permissions.

Answer: b) This file identifies the packages you'd like to integrate into your application.

8. Which Artisan command is used to remove the compiled class file?

- a) `clear-compiled`
- b) `clear compiled`
- c) `compiled:clear`
- d) `clear:all`

Answer: a) `clear-compiled`

9. Which function is used to find out the current route name?

- a) `request()->getName()`
- b) `request()->route->getName()`
- c) `request()->route()->getName()`
- d) None of these

Answer: c) `request()->route()->getName()`

10. Which file configures the application URL, timezone, locale, and autoload service provider?

- a) `app.php`
- b) `cache.php`
- c) `compile.php`
- d) `Oauth.php`

Answer: a) app.php

11. Which is used in Laravel to prevent malicious users?

- a) \$fillable
- b) \$check
- c) \$filable
- d) \$filliabled

Answer: a) \$fillable

12. What type of databases does Laravel support?

- a) MySQL, Oracle, SQLite, Microsoft SQL Server
- b) MySQL, PostgreSQL, SQLite, Microsoft Access
- c) MySQL, SQLite
- d) MySQL, PostgreSQL, SQLite, Microsoft SQL Server

Answer: d) MySQL, PostgreSQL, SQLite, Microsoft SQL Server

13. Which directory contains robots.txt file?

- a) app
- b) config
- c) routes
- d) public

Answer: d) public

14. Which method is used to modify the value of an attribute in Laravel?

- a) Getter
- b) Accessor
- c) Mutator
- d) None

Answer: c) Mutator

15. Which file is used to verify a user?

- a) RedirectIfAuthenticated.php
- b) VerifyCsrfToken.php
- c) AuthenticatedRedirect.php
- d) Authenticated.php

Answer: d) Authenticated.php

16. What do you mean by Artisan?

- a) API
- b) Command-line interface
- c) Cmd
- d) Plugins

Answer: b) Command-line interface

17. The abbreviation of CSRF is:

- a) Cross Scripting Reformative Function
- b) Cross Style Reporting Formula
- c) Cross System Rich Format
- d) Cross-Site Request Forgery

Answer: d) Cross-Site Request Forgery

18. Which directive is used to embed the section into a template?

- a) @yield
- b) @contents
- c) @section
- d) None

Answer: a) @yield

19. What do you mean by the keyword "Has Many"?

- a) One to one relationship
- b) One to many relationship
- c) Many to many relationship
- d) Belongs to relationship

Answer: b) One to many relationship

20. Which of the following is the location of Middleware?

- a) app/Http/Middleware
- b) app/Middleware
- c) app/Config/Http/Middleware
- d) lib/Http/Middleware

Answer: a) app/Http/Middleware

21. What do you mean by Heroku?

- a) Cloud-based hosting solution
- b) Web hosting solution
- c) Laravel Package
- d) Laravel command

Answer: a) Cloud-based hosting solution

22. `Todolist::take(5)->skip(10)->orderby("id", "asc")->get()` means:

- a) Select first 5 records after skipping 10 records
- b) Select last 5 records after skipping 10 records
- c) Select first 5 records
- d) Select last 5 records

Answer: a) Select first 5 records after skipping 10 records

23. Which mechanism is used in Laravel Elixir to change the database structure?

- a) ORM
- b) Migration
- c) Database seeder
- d) None

Answer: b) Migration

24. What is the purpose of `composer.lock`?

- a) It is used to contain information about the state of the installed composer packages at the time these packages were last updated.
- b) It is used to lock all the packages so that they would never change later.
- c) It is used to contain information about the state of the installed composer packages at the time they were first installed.
- d) It is used to manage autoloading of packages.

Answer: a) It is used to contain information about the state of the installed composer packages at the time they were last updated.

25. How can you edit a record in RESTful service?

- a) Get
- b) Post
- c) Put

d) Delete

Answer: c) Put

Second Part

1. Which file is responsible for scheduling any command?

- a) App.php
- b) Kernel.php
- c) Router.php
- d) Config.php

Answer: b) Kernel.php

2. What is the function of dd()?

- a) Controller function
- b) Session function
- c) Helper function
- d) None

Answer: c) Helper function

3. How can we navigate links?

- a) Cropping
- b) Rotating
- c) Pagination
- d) All of the above

Answer: c) Pagination

4. Which is used in Laravel to prevent malicious users?

- a) \$fillable
- b) \$check
- c) \$filable
- d) \$filliabled

Answer: a) \$fillable

5. Which file is required for user authentication?

- a) app.php

- b) cache.php
- c) compile.php
- d) auth.php

Answer: d) auth.php

6. What do you mean by Heroku?

- a) Cloud-based hosting solution
- b) Web hosting solution
- c) Laravel Package
- d) Laravel command

Answer: a) Cloud-based hosting solution

7. Where do we set database credentials?

- a) Session
- b) Config
- c) app
- d) Resources

Answer: b) Config

8. How can you make text fields in Laravel?

- a) Form::text
- b) Form::submit
- c) Form::string
- d) Form::textarea

Answer: a) Form::text

9. What is the function of composer.json?

- a) This file is used to configure the composer package manager.
- b) This file identifies the packages you'd like to integrate into your application.
- c) This is used to regularly maintain your application package.

Answer: b) This file identifies the packages you'd like to integrate into your application.

10. What do you mean by Artisan?

- a) API
- b) Command-line interface

- c) Cmd
- d) Plugins

Answer: b) Command-line interface

11. Which property is used to identify columns that should not be passed into JSON or an API response?

- a) \$fillable
- b) \$table
- c) \$column
- d) \$hidden

Answer: d) \$hidden

12. Which directory contains robots.txt file?

- a) app
- b) config
- c) routes
- d) public

Answer: d) public

13. Which of the following function is called accessors?

- a) Getter Functions
- b) Setter Functions
- c) Member Functions
- d) None

Answer: a) Getter Functions

14. `Todolist::take(5)->skip(10)->orderby("id", "asc")->get()` means:

- a) Select first 5 records after skipping 10 records
- b) Select last 5 records after skipping 10 records
- c) Select first 5 records
- d) Select last 5 records

Answer: a) Select first 5 records after skipping 10 records

15. Where do we need to set the database connection in Laravel?

- a) config.php

- b) .env file
- c) In seed files
- d) setting.php

Answer: b) .env file

16. Which mechanism is used in Laravel Elixir to change the database structure?

- a) ORM
- b) Migration
- c) Database seeder
- d) None

Answer: b) Migration

17. Which file is used to configure third-party services such as Mandrill for email delivery?

- a) services.php
- b) session.php
- c) filesystems.php
- d) mail.php

Answer: a) services.php

18. Which is the default location of your project's view?

- a) mail.php
- b) config.php
- c) view.php
- d) resources/views

Answer: d) resources/views

19. How can you create a model in Laravel?

- a) php artisan make: [ModelName] model
- b) \$ artisan make: [ModelName] model
- c) \$ php artisan make:model [ModelName]
- d) \$ php artisan create:model [ModelName]

Answer: c) \$ php artisan make:model [ModelName]

20. Which of the following is false?

- a) @extends directive tells which layout should be used

- b) File extension of view should be like example.blade.php
- c) None of the above
- d) @yield directive

Answer: c) None of the above

21. Which files are used for Laravel database connection? (choose two)

- a) database.php
- b) .env
- c) config.php
- d) both a,b

Answer: d) both a,b

22. Which middleware is used to manage CSRF protection?

- a) VerifyCsrfToken.php
- b) RedirectCsrfToken.php
- c) TokenVerifyCsrf.php
- d) RedirectIfAuthenticated.php

Answer: a) VerifyCsrfToken.php

23. What is the role of middleware?

- a) Ignore request
- b) Process request and response
- c) Send request
- d) Get response

Answer: b) Process request and response

24. What is the purpose of Laravel Forge?

- a) Conjunction with another hosting service
- b) Connection with database
- c) Loading the full application
- d) Provisioning and deploying applications

Answer: a) Conjunction with another hosting service

25. What is composer.json?

- a) This file identifies the packages you'd like to integrate into your application.

- b) This file is used to configure the composer package manager.
- c) This is used to regularly maintain your application package.

Answer: a) This file identifies the packages you'd like to integrate into your application.
